

# WRH solves universal problems

## In processing container design and material failures

**Food industry applications can't afford the risk of tray design & material failures, causing:**

- ◆ **Contamination problems** – Untraceable product contamination, plastic chips and fiberglass filaments
- ◆ **Profitability problems** - Employee injury and ongoing replacement tray purchases
- ◆ **Sanitation problems** – De-lamination/fissure cracks causing bacterial growth & uncleanable surfaces

Broken tray releasing glass fiber contamination

Impossible to clean surface due to de-lamination

Sharp/cracked edges cause injury and contamination

Worn out edges expose unsanitary bare metal frame

**WRH Exclusives:**

Custom Teflon® Formulations

**ELIMINATE YOUR PROBLEMS by investing in WRH trays!**

*All WRH products are designed to be virtually indestructible and sanitary for years of dependable service. Our products are guaranteed not to shatter, chip, crack, warp or delaminate!*

Teflon® is a registered  
Trademark of Dupont
